

Leading the Way.

As the premier producer of specialty cleaning and water treatment products in the Western U.S., Mt. Hood Chemical is leading the way in creating environmentally friendly, sustainable solutions for institutional and industrial customers. We believe that sustainability is not only a business strategy, but also a value that filters through every part of our operation. Through such initiatives as reducing the environmental impact of our products and integrating biofuels and environmental design into our business model, Mt. Hood Chemical is building a legacy of sustainability and product innovation. Examples include:

- We manufacture concentrated products which save millions of gallons of water.
- We recycle or reuse many of our containers and recycle nearly 50% of our process water.
- Our delivery trucks have been converted to BioDiesel and we're adding hybrid vehicles to our fleet.
